DNA Network Discovery

Detailed Reports „All Types, Models, and Manufacturers“

Report Example, most tables shortened in length, customer name and IP addresses deleted by neteXpose

Table of Contents

1.0 Summary

2.0 DNA Detailed Reports

2.1 All Types

2.2 All Models

2.3 All Manufacturers

Disclaimer:

neteXpose assumes no responsibility for the accuracy or completeness of the information, including reports, texts, tables, diagrams, etc. neteXpose assumes no responsibility for the discovery, neither for the configuration, nor for the execution on the customer site. neteXpose assumes no responsibility for the accuracy or completeness of the discovery results, or for the analysis and interpretation of the data.

neteXpose shall not be liable for any direct, indirect, special, consequential or incidental damages, related to the discovery execution on the customer site, and the analysis of the discovery data.

1.0 Summary

This report summarizes in detail the discovered network devices and end-stations, sorted by types, models, and manufacturers at the customer `New Setup`.

The reports contain customer-sensitive data such as IP addresses, site names, etc.

2.0 DNA Detailed Reports

2.1 DNA All Types

The following tables sort the discovered network devices and end stations per type. A separate table is produced for every device type, including title and total number per device type. Every device type is specified by name, IP address, type, model, manufacturer, description, and serial number (if indicated by manufacturer). The tables are alphabetically listed.

Table Definitions:

UUID:

Database identifier

Name:

Device name of the customer or manufacturer

IP_Address:

Device IP address

Type:

Assigns discovered device to a certain device type

Model:

Model name of the manufacturer

Manufacturer:

Name of the manufacturer

Description:

Device description of the manufacturer

Serial:

Serial number of manufacturer, if indicated

2.2 DNA All Models

The following tables sort the discovered network devices and end stations per model. A separate table is produced for every model, including title and total number per model. Every device type is specified by name, IP address, type, model, manufacturer, description, and serial number. The tables are alphabetically listed.

Table Definitions:

UOID:

Database identifier

Name:

Device name of the customer or manufacturer

IP_Address:

Device IP address

Type:

Assigns discovered device to a certain device type

Model:

Model name of the manufacturer

Manufacturer:

Name of the manufacturer

Serial:

Serial number, if indicated by manufacturer

2.3 DNA All Manufacturers

The following tables sort the discovered manufacturers, including total device number per manufacturer. Every device type of a certain manufacturer is specified by name, IP address, type, model, manufacturer, description, and serial number. The tables are listed alphabetically.

Table Definitions:

UOID:

Database identifier

Name:

Device name of the customer or manufacturer

IP_Address:

Device IP address

Type:

Assigns discovered device to a certain device type

Model:

Model name of the manufacturer

Manufacturer:

Name of the manufacturer

Serial:

Serial number of the manufacturer (if indicated)

**Table 2.3:
